New Interface

- Modern and user-friendly dashboard
- Easy and intuitive navigation
- Centralized administration with streamlined workflow

TSplus V12 is the best alternative to Citrix, Ericom and Parallels for applications publishing and multi-platform/devices remote connections.

Try our Powerful Companion Tools

Secure Your Web Portal With TSplus 2FA

Maximize the security of your web portal. Passwords and Usernames are not enough to protect your data from sophisticated cyber-attacks. TSplus 2FA offers a two-step verification process using a QR code or SMS to prevent malicious access to your servers.

Protect Your RDS Servers With TSplus Advanced Security

Remote Desktop is a great tool but it can put your servers at risk. You need the best available protection to detect, block and fight threats during remote sessions. RDS-Knight provides up to six features to keep servers and users safe at all times.

Monitor Remote Sessions Server Genius

To keep your servers healthy, administrators must have reliable information about all connections to the servers. Server Genius lets administrators monitor website health, web portal connections and remote desktop sessions. With Server Genius, potential issues can be caught before they become problems with intelligent and configurable alerts.
