TSPLUS VIRTUAL PRINTER

For businesses thatneed to securely send and print documents between offices in multiple locations or employees who want to print work documents when working from home, the *Virtual Printer®* offers a practical remote printing solution.

1 EASY INSTALLATION

Setting up remote printing is quick and easy: The TSplus Virtual Printer is driverless and requires little configuration.

2 INSTANT PRINTING

Once both server and client components are installed, it takes only two clicks to print from your remote session to the local printer of your choice, wherever you are.

3 SEAMLESS EXPERIENCE

Our Virtual Printer detects and maps the list of local printers to the server exactly as if they were directly connected. Experience a smooth, trouble-free printing process - just like if you were printing locally!
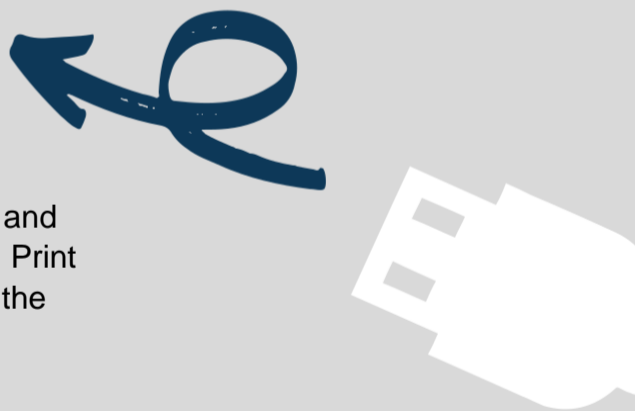

4 QUALITY JOB

By reducing printing data volume, the Virtual Printer speeds up data transfer for a fast and high-quality printing job!
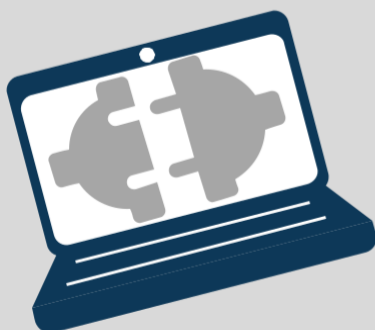

5 SECURE TRANSFERS

The print jobs are run within the corporate network and benefit from all security measures already in place: Print any file securely stored on your central server with the confidence that your data stay safe.

6 CUSTOMIZABLE

The Virtual Printer is a flexible Remote Printing solution: compatible with all brands of printers, It works in single AND multi-usersenvironments!

7 SCALABLE TO YOUR NEEDS

The TSplus Virtual Printer supports all printer brands to offerboth standard and specific printing featureswith the best quality:color&resolution; paper size, orientation…

8 COST-SAVING SOLUTION
